# 29,000,000

**SMALL BUSINESSES** currently support the US economy. We salute you.

For your small business to thrive, you need to spend wisely. And that means you should never have to spend money on things you don't need. After all, if you want lunch, you don't have to buy a restaurant... you can buy a meal. Going on a business trip? You can buy a plane ticket instead of a plane.

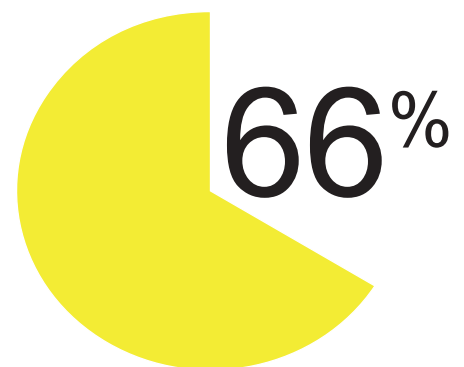

So why should small business owners pay for more than they actually need for a skilled workforce?

## #thefutureofworkisnow

66% of American workers will work for less compensation in exchange

for a *flexible* work environment.

Cisco Connected World Technology Report

# Listen Up

Businesses save an average of \$20,000 a year for each full-time employee who works remotely.<sup>1</sup>

Businesses that utilize flexible employees are often able to provide customer service over a greater span of hours.<sup>2</sup>

Flexible employees are more satisfied, and more willing to work hard to help their employers succeed.<sup>3</sup>

Remote workers are more engaged.<sup>4</sup>

Remote workers may not require as much compensation if they are afforded the benefits of telecommuting.<sup>5</sup>

Dun & Bradstreet

# Since 2010, we have been saving small businesses time and money.

## What exactly do you do?

Our primary operation is called [Business Process Outsourcing](#). BPO means our Clients contract some or all of their necessary business functions to us -- namely administrative, creative and technical -- so they can focus on their core competencies and revenue-increasing activities.

## How will I know you are doing the work?

If we didn't perform, there would be nothing to return or report to you! You will always have access to a dedicated point of contact/Manager, whom you can contact and will be in contact with you at each milestone, or at a frequency of your choosing. We have a high return Client rate and have been in business since 2010 because we deliver on time and as promised.

## How can you save my small business money?

Even at our highest pricing tier, we are [less expensive than a traditional employee](#) with the same administrative + creative + technical skill sets. Our Clients do not pay for computers, software, office space, worker-related taxes, insurance, benefits, parking or for unused time. Plus, our workforce is scalable: there when you need us, gone when you don't. And, because 66% of Americans will work for less compensation in exchange for working from home, our reasonable rates lend you a high return on investment.

## What is a "virtual" team?

We function by using electronic communications: laptop computers, email, video conferencing, [screen sharing](#), mobile phones, and cloud file collaboration via [Dropbox](#). We can work anywhere there is internet access, including a home office or any wi-fi enabled venue such as Starbucks.

## What about the risk of sharing sensitive or proprietary information?

All team members, whether virtual or visit onsite, have successfully passed a criminal background check. All have executed a Non-Disclosure Agreement, and a confidentiality clause in your Contract for Service further binds Management on behalf of the entire company. Dropbox is encrypted for [safe file transferring](#). There has never been an incident of theft, negligence or loss to the Company or Clients.

CALL OR [CLICK](#) TODAY TO FIND OUT MORE!

Our small but talented team of Administrative, Creative and Technical Rockstars collaborate and combine their valuable areas of expertise.

We understand small business because we are small business.
